### Pass-Through windows

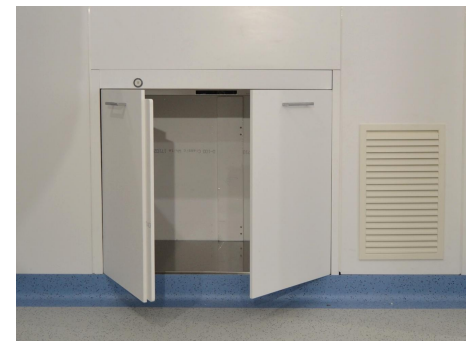

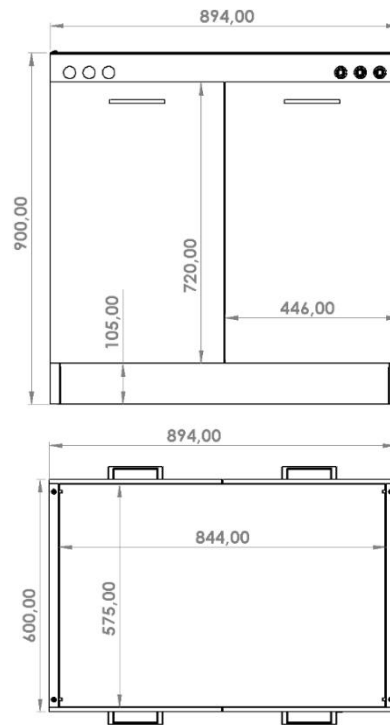

Double door pass-through window made of 10/10 mm stainless steel AISI 304 with safety glass doors 10 mm both interlocked with stainless steel handle for ergonomic opening, with self-lubricating Teflon sliding and dust-proof gaskets. Interlocked opening and closing mechanism with balancing for precise and fluid positioning.

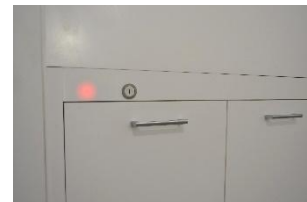

Equipped with one release button for opening and two Red and Green LEDs for indicating the interlocking status on each side. The window consists of panelling that can be inspected for easy access to the internal components during maintenance. The interlocked system is equipped with a manual emergency release system for opening windows.

### Pass-Through cabinet

Double door pass-through cabinet with structure in stainless steel AISI 304 and doors in steel or betacryl. Closed perimeter, can be opened from dirty side/ clean side by n. 2 hinged doors with perimeter dust-proof gaskets. Smooth bottom. Doors with electric interlock that does not allow the simultaneous opening of doors dirty side/ clean side. Door release through button with green/ red indicator light. Mounting on stainless steel plinth H 100 mm. Absence of sharp edges and contact cuts that can also be reached during maintenance and cleaning operations. Panels with smooth, washable surfaces.
